

CLAIMS

- Sub 1
1. Reversible wristwatch including a first case (1, 101) enclosing elements able to control a first display (3, 103) and a second case (2, 102) enclosing elements able to control a second display (104), said first and second cases each having a back cover (85, 86; 125, 126) and being placed back-to-back, characterised in that each of
- 5 the two cases (1, 2; 101, 102) includes at least one securing element (4, 5; 135, 136) arranged to be secured in a removable manner to a corresponding securing element of the other case, to secure the cases to each other in a position in which their respective back covers are adjacent.
2. Wristwatch according to claim 1, characterised in that each case contains
- 10 an electric battery and includes a battery hatch (83, 127, 128) in its back cover.
- Sub 1
3. Wristwatch according to claims 1 or 2, characterised in that the securing elements of each of the cases (1, 2) include horns (4, 5) through which bars (6, 7; 8, 9) pass, said bars acting both as means for securing the first case (1) to the second case (2) and means for securing each of the ends (10, 11; 12, 13) of the wristband (14, 15)
- 15 to the assembly formed by said first and second cases.
4. Wristwatch according to claim 3, characterised in that the first (1) and second (2) cases include at six o'clock and a twelve o'clock a pair of horns (16, 17; 18, 19; 20, 21; 22, 23) provided with holes (24, 25; 26, 27; 28, 29; 30, 31), each horn (16, 17; 20, 21) of the first case (1) being juxtaposed with a horn (18, 19; 22, 23) of the
- 20 second case (2) when said cases are placed back-to-back to define, at six o'clock and at twelve o'clock a recess (32, 33) occupied by the corresponding end (11, 10) of the wristband (14), said ends (11, 10) being provided with a hole (34, 35) arranged in alignment with the holes of the horns to accommodate the bars (7, 6) securing the first case to the second and the wristband to the assembly thereby formed.
- 25 5. Wristwatch according to claim 3, characterised in that the first (1) and second (2) cases include at six o'clock and twelve o'clock four horns (5), each horn of the first case being superposed on and encased in a horn of the second case when said cases are placed back-to-back to define at six o'clock and twelve o'clock three recesses (36, 37, 38; 39, 40, 41) which are occupied by the corresponding end (13,
- 30 12) of the wristband (15) divided into three sections (42, 43, 44; 45, 46, 47), the first case having at six o'clock and in order, a first male horn (48) provided with a hole (49) and encased in a first female horn (50) of the second case (2), second (51) and third (52) female horns respectively encased in second (53) and third (54) male horns of the second case (2), said horns each being provided with a hole (55, 56), and a fourth
- 35 male horn (57) provided with a hole (58) and encased in a fourth female horn (59) of

the second case (2), said first case (1) having, at twelve o'clock and in order, a first female horn (60) encased on a first male horn (61) of the second case (2), said horn (61) being provided with a hole (62), second (63) and third (64) male horns each provided with a hole (65, 66) and respectively encased in second (67) and third (68) female horns of the second case, and a fourth female horn (69) encased in a fourth male horn (70) of the second case (2), said horn (70) being provided with a hole (71), each of the three sections (42, 43, 44; 45, 46, 47) of the ends (13, 12) of the wristband (15) being provided with a hole (72, 73, 74; 75, 76, 77) arranged in alignment with the holes of the horns to accommodate the bars (8, 9) which secure the first case (1) to the second case (2) and the wristband (15) to the assembly thereby formed.

6. Wristwatch according to claim 1, characterised in that said securing elements (135, 136) are arranged on the back cover of each case.

7. Wristwatch according to claim 6, characterised in that the securing elements (135, 136) include assembly elements of the dovetail type.

15 *Sub 8* 8. Wristwatch according to any of claims 1, 2, 6 and 7, characterised in that the two cases secured to each other form a movable case (100), which is mounted so as to pivot and slide on a support (105) secured to a wristband (108), the support having two parallel lateral bars (110) between which the movable case occupies two mutually reversed use positions, in which two opposite lateral faces (141) of the movable case extend along said bars.

20 9. Wristwatch according to claim 8, characterised in that each bar (110) of the support is provided with an articulation trunnion (118) which is engaged in a slide-way (140) of the corresponding lateral face (141) of the movable case, and in that said slide-way (140) is formed by juxtaposing two recesses (133, 134) of L-shaped profile, each arranged along an edge of the back cover of each case.

10. Wristwatch according to claim 9, characterised in that each bar (110) of the support is provided with securing means including a removable bar (115) for securing it to the wristband and in that said trunnion (118) is secured to a removable part (119) which is held in place on the bar by means of the removable bar (115).

30 11. Wristwatch according to claim 8, characterised in that the movable case (100) slides along the support in a perpendicular direction to the wristband.

12. Wristwatch according to claim 8, characterised in that the movable case slides on the support in a parallel direction to the wristband.
